

Business Analytics On Mobile

High Speed Reporting on Mobile

Interactive Visualizations

Enterprise Mobile Security

Self-Serve Analysis

intellicus

Intellicus Mobile BI takes your reports and analytics to tablets and phones, on both Android and iOS platforms. Our mobile analytics solution delivers instant access to your important business insights.

Interactive Visualizations

Perform ad-hoc and multidimensional analysis on the move with or without internet connectivity. Choose from a wide variety of charts to build visually rich reports on your mobile.

Mobile-Ready Reports

Subscribe to Dashboards and Reports on mobile devices. Update data when online, interact & analyze while offline. Compare versions for delta analyses.

Self-Serve Analysis

Swipe & tap actions for measuring data on various parameters. Draw charts on different dimensions and drill into details. Apply filtering, sorting and grouping for detailed analysis.

Phenomenal Ad-hoc Report Viewer

Intellicus Mobile Ad-hoc report viewer provides accurate and real-time ad-hoc report which is consistent with web counterpart. Now, what you see on web is what you see on mobile.

High Speed Reporting

Intellicus High Speed Reports extend to mobile devices. Experience the interactive analysis of data from various altitudes.

Embed Mobile BI

Intellicus mobile SDK embeds all the mobile BI features into your mobile application. Creating a new mobile application or releasing a customized version on the App store is a matter of few hours of work using Intellicus mobile SDK.

In the store

Intellicus stand-alone mobile application and the SDK supports both iOS and Android devices.

Download the Intellicus mobile application from the stores and try it yourself!
