

Business Insights on-the-move: With Intellicus on your Android Smart Phones

India, 17th August 2016: Intellicus Technologies, a leading provider of Enterprise Reporting and Business Insights Platform, today announced the release of Intellicus Mobile Application on the Google Play Store. With this latest release, Android users can have instant access to all the critical data on the move. This helps them in getting up-to-date information on their fingertips to take better decisions.

Intellicus Mobile App provides interactive and personalized analytical views over enterprise data, giving dynamic insights into the key performance indicators of any business. Users can quickly relate the KPIs with detailed data readily using the drill downs. Intellicus native Android application allows offline analysis and users can refresh the updated content, whenever the device is online.

This mobile app can be downloaded from Google Play Store. The users can connect it with the Intellicus Server version 5.3; over SSL. The application implements enterprise data security rules on devices seamlessly.
