

Intellicus' Latest Version 6.0 Enables Multi-Dimensional Analysis And Advanced Visualization

India, 17th August 2016: In step with the invigorating pace of enterprise reporting and business analytics, Intellicus announced the launch of the latest version of its flagship product—Intellicus 6.0. Significantly enhancing the core functionality even beyond its already high levels, Intellicus' latest version enables the end user with faster, better decision making by offering multi-dimensional analysis of vast and ever growing data from varied sources. The complex data analytics is made easy through its in-built OLAP Engine and Executive Dashboards.

The announcement was made at HIMSS conference, held in Las Vegas, USA, on February 20 – 24, 2012. The company's pavilion successfully garnered attention of the healthcare analytics solution providers, present at the conference. Leveraging the opportunity offered by this event, Intellicus also demonstrated live its next-generation BI visualization on Big Data, Mobile, and Cloud.

Intellicus' Big Data Analytics entails the use of Hadoop for end user driven analysis and reporting for Big Data. Another product showcased was its powerful Mobile BI platform for iPhone and iPad devices. The platform is supported with visually interactive UI and drill down capabilities, and helps users access critical insights into the KPIs of their businesses anytime, anywhere.

At the conference, Intellicus announced its support for multiple cloud deployment models like public, private, and hybrid cloud. Healthcare analytics solution providers can now leverage Intellicus to provide Analytics as a Service on Amazon, or other pay-as-you-go platforms. The showcase also included Workflow based Query Objects and integration with R Analytics platform and its benefits for healthcare data scientists.

The Intellicus representatives discussed the technical and commercial aspects of OEM tie up with the ISVs & SaaS vendors. The discussion encompassed the ease with which Intellicus can be seamlessly integrated in other software, which can further be distributed to the customers.

HIMSS encourages global leadership for the optimal use of healthcare information technology (IT) and management systems.

About Intellicus: Intellicus is one of the world's leading Business Intelligence and Analytics platforms. More than 60% of Fortune 500 companies are using Intellicus to build powerful reports and dashboards with ease.
