

Intellicus Technologies exhibited as a Silver sponsor in Enterprise Data World (EDW)

India, 17th August 2016: Intellicus Technologies exhibited as a Silver sponsor in Enterprise Data World (EDW) – the business world’s most comprehensive educational event about data and information management. The event was held in San Diego April 28th – May 2nd, 2013 at Sheraton Hotel & Marina.

At the event, Intellicus demonstrated its Big Data Analyses capabilities through MOLAP on Hadoop which takes the execution of the cube to Hadoop rather than bringing data out of Hadoop. Subsequently, Intellicus automatically creates Map reduce jobs which are required to analyze the data.

To showcase this Intellicus used data from an Internet Service Providers (ISP), which has huge data to process and analyze as it captures every web request that goes through it. Intellicus’ Dashboards and Graphs showed the continents from which majority of traffic was coming. Further drilling showed the pattern for different states of the selected country. Further, the IP usage pattern was monitored to identify the customers with highest usage.

Intellicus can connect to diverse data sources and allows users to join and transform data from these diverse sources. Intellicus can connect to relational databases, Hadoop cluster, web service and HBase. The other options available are TeraData, Vertica, GreenPlum, Hive, PIG and many more.

About Intellicus: Intellicus is one of the world’s leading Business Intelligence and Analytics platforms. More than 60% of Fortune 500 companies are using Intellicus to build powerful reports and dashboards with ease. Our interactive web and mobile platforms give users the power to access, view, and interact with corporate data anywhere. With over 50,000 installations worldwide, we are assisting organizations across verticals to make better informed decisions.
