

Intellicus unveils its new analytical offering at Retail Technology Conclave, launches IntellicusCloudBI

Mumbai, September 2019: Intellicus Technologies, a leading global provider of business intelligence and analytics, launched its cloud-based business intelligence suite at the Retail Technology conclave, Mumbai. IntellicusCloudBI, a cloud based, AI driven analytics solution empowers software vendors to take the leap of being on cloud and deliver analytics on mobile for their software product within a few hours.

With IntellicusCloudBI software vendors can give their users access to insights on a mobile-first concept. It empowers their customers with exponential value of their business data collected in the software by adding analytics and delivering it to them with ease. Delivering unmatched scalability and security, IntellicusCloudBI app adds speed to everyday decision-making for its users by providing access to real-time data insights, anytime, anywhere.

The whole concept of next gen BI revolves around empowering business users. The idea is to enable business users to do self serve analytics and perform predictive, what-if analytics on their everyday data.

IntellicusCloudBI platform offers the most sophisticated BI features like interactive dashboards, multi-dimensional OLAP, machine learning based business predictions, threshold-based alerts and GIS reports. You can read more about IntellicusCloudBI [here](#).
