

Intellicus Unveils its New Cloud Offering, Launches BI Server on Azure Marketplace.

India, 30th January 2018: Intellicus, a leading business intelligence and analytics platform, has unveiled its new offering on cloud. Intellicus BI Server is now available on Azure Marketplace.

Intellicus BI Server on Azure is a fully web based, secure, and scalable data analytics platform that easily fits into an organization's cloud strategy. Starting from 5 users, Intellicus can be scaled to 10,25,50 or 100 users as per business requirements.

Intellicus VMs or its data can be archived and restored anytime so that one can run Intellicus only when want to like select days of a month etc.

Intellicus BI Server supports Windows and Linux OS and can be instantiated as an Azure virtual machine instance (VMI) by selecting any of the available options including General Purpose, Memory Optimized, and Compute Optimized. The 5 user Intellicus BI Server VMI can run efficiently on a 2 core General Purpose VMI with 4 GB RAM.

Intellicus BI Server can connect to diverse data sources- both modern and traditional. You can connect Intellicus to your on-premise data or on cloud data in a few clicks and start building reports and dashboards immediately.

Key features of Intellicus BI Server on Azure include:

- Pixel Perfect Reporting
- Ad-Hoc Reporting
- High Speed OLAP
- Dashboards
- Mobile Analytics
