

Intellicus exhibited as a Silver Sponsor in Hadoop Summit 2013

India, 17th August 2016: Intellicus Technologies exhibited as a Silver sponsor in Hadoop Summit 2013 – the 6th Annual Hadoop Summit, the leading conference for the Apache Hadoop community. The event was held in San Jose on June 26-27, 2013 San Jose Convention Center.

At the event Intellicus demonstrated the capability to apply Cubes on Hadoop. Intellicus extended its innovative multi-dimensional pre-aggregation based analytical solution to the Hadoop platform. This breakthrough concept introduces processing of data at source; rather than bringing in data and then processing it.

To explain this further, capacity of Hadoop architecture to process Petabytes of data by parallel processing is utilized by Intellicus. It generates a series of MapReduce jobs to pre-aggregate large amount of data, which already exists on Hadoop, without the need of bringing in data to Intellicus memory.

Intellicus also displayed its new OLAP viewer for Mobile users. An innovative and user-friendly interface, it provides slicing and dicing capabilities on the move.

About Intellicus: Intellicus is one of the world's leading Business Intelligence and Analytics platforms. More than 60% of Fortune 500 companies are using Intellicus to build powerful reports and dashboards with ease. Our interactive web and mobile platforms give users the power to access, view, and interact with corporate data anywhere. With over 50,000 installations worldwide, we are assisting organizations across verticals to make better informed decisions.
